REF: EXAM_BRIEF_V1.0

WIX1002: FINAL EXAM PROTOCOL

Fundamentals of Programming / Sem 1 2025-26

Status: Mandatory Briefing. Read carefully.

NotebookLM

MISSION PARAMETERS

DATE
Inter

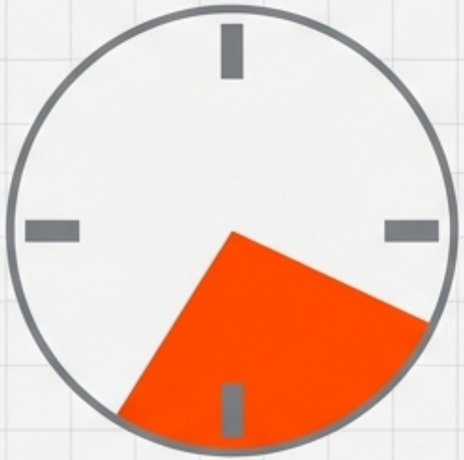

3 February 2026

Tuesday

VENUE
Inter

Exam Hall

TIMELINE
Inter

START: 3:30 PM

DURATION:
3.3 HOURS

NotebookLM

FORMAT & EQUIPMENT

THE FORMAT

Inter, Deep Navy

Paper-based Assessment.

Multiple Choice Questions (MCQ) + Multiple Choice Answer (MCAs).

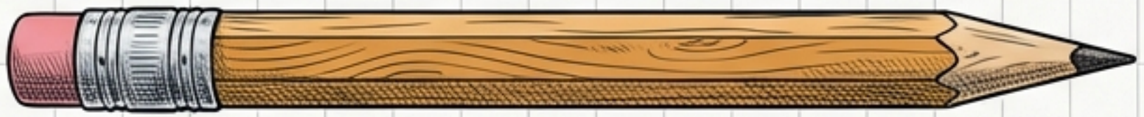

THE CONSTRAINT

Inter, Deep Navy

Analog Environment.
No Compilers.

COMPULSORY: 2B PENCILS

Bring your own high-quality 2B pencils.
None will be provided at the venue.
Failure to bring equipment is a critical failure.!

NotebookLM

OPERATIONAL SCOPE

Week 1 — Week 13

Concept Verification	Syntax Analysis	Debugging / Error Detection
Code Completion	Output Prediction	Application Logic

You will be tested not just on writing code, but on predicting how the machine interprets it.

NotebookLM

CASE STUDY 01: CONTROL FLOW

Code Editor

```
1  static int g() {
2      try { return 1; }       // I
3      }finally { return 2; } // II
4  }
5  System.out.println(g()); // III
```

Analyze the snippet. Which return statement takes precedence?

- ○ A. Compiles; prints 1
- ○ B. Compiles; prints 2
- ○ C. Fails: return not allowed in finally
- ○ D. Fails: unreachable code at I
- ○ E. None

NotebookLM

CASE STUDY 02: EXCEPTION HANDLING

Code Editor

```
1  int[] a = new int[-1];                          // I
2  int[] b = new int[3]; b[3] = 10;                // II
3  int[] c = {1,2,3}; System.out.println(c[2]); // III
```

Identify which lines throw an exception at RUNTIME (not compile-time).

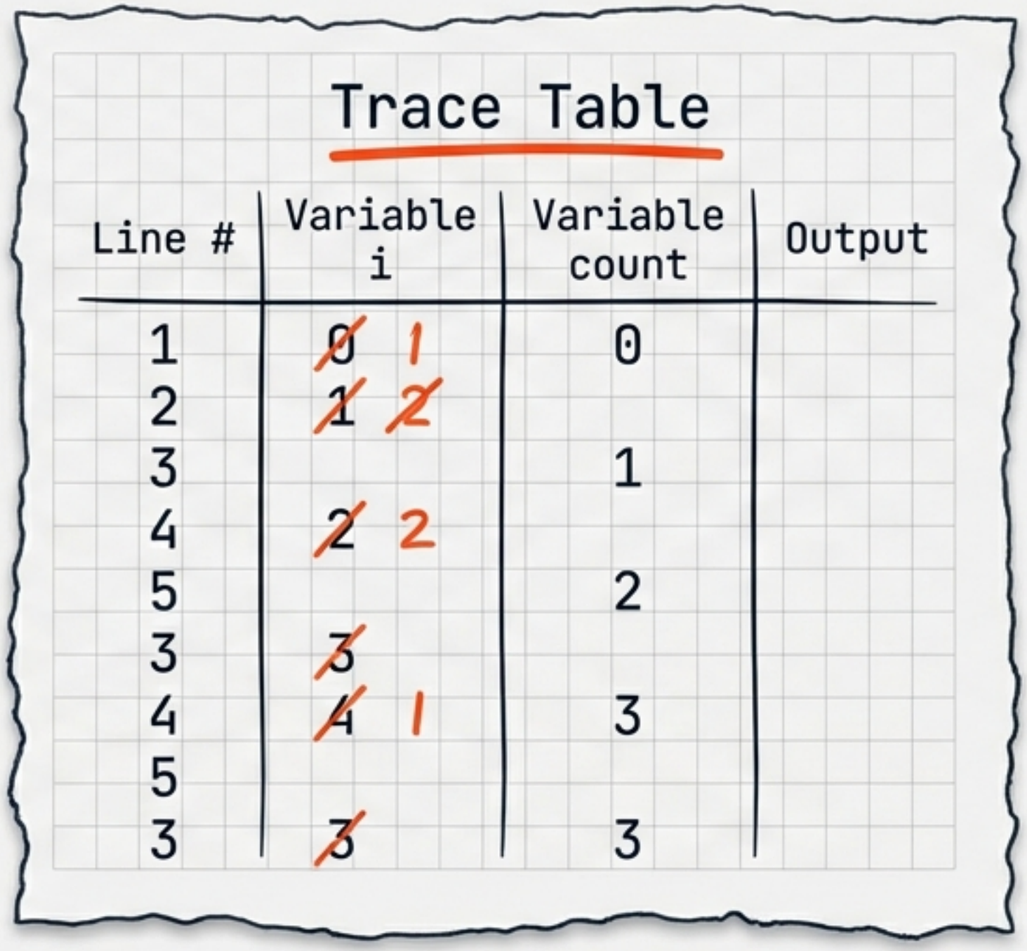

- ○ A. I + II
- ○ B. II only
- ○ C. I only
- ○ D. I + II + III
- ○ E. None

NotebookLM

THE PAPER COMPILER

Strategy: Since you cannot run the code, you must simulate the JVM in your head.

- Draw a grid on your paper.
- Track every variable's value as it changes line-by-line.
- Do not guess. Execute the code mentally.

FINAL PRE-FLIGHT CHECK

[ ] **IDENTIFY:** Student ID Card.

[ ] **TOOLS:** 2B Pencils (x2) + Eraser.

[ ] **TIMING:** Arrive by 3:15 PM for 3:30 PM start.

[ ] **MINDSET:** Read every line of code. Watch for boundary errors.

Good luck. Code carefully.
